

LAKE COMO SCHOOL OF ADVANCED STUDIES

Sixth Virtual Summer School 2025 Lake Como School

New Approach Methodologies (NAMs): the Strategic Vision in Science

14-15 May 2025

Alternative Methods to animal testing, with the application of 3Rs principle, *Reduce, Refine, Replace* (Directive 2010/63 EU), and New Approach Methodologies (NAMs) need to be implemented and encouraged in order to find a practical approach and application in different and interconnected field of science. Innovative tools like complex methods, models and methodologies from spheroids to microfluidic systems (MPS) and their application, are the new frontier in a predictive science.

The *Sixth Summer School New Approach Methodologies (NAMs): the strategic vision in Science* is dedicated to the application of innovative technologies and methodologies, with a strategic approach.

The School will be open to **20** qualified and selected students. Participation is free of charge. To apply visit <https://nams.lakecomoschool.org/application/>. **Application deadline: 8 May 2025.**

Director of the Summer School:

Prof Francesca Caloni Università degli Studi di Milano Department of Environmental Science and Policy (ESP), Milan
